TOPCON MAGNET OFFICE

This class covers the fundamental skills every operator will need to become productive. This class will build on the data collected from the Magnet Field Class but attendance to that class is not required. We will cover the basics of DWG and Field Data management, map and drawing skills, surfaces, volumes and plotting.

This is a hands-on class, so I encourage you to bring your laptop with the current version of Magnet Office. Class starts at 9 am, but trainer will be available at 8 am for users needing help getting set up. Computers will be available for users without their own copy of Office.

- Overview of Magnet Office and breakdown of Magnet Office products
- Fundamentals of Magnet Office User Interface
- Project Creation and settings
- Data Management
- Importing and working with Magnet Field Data
- Feature Coding and Symbiology
- Autolinetwork
- Map and Drawing skills
- Surfaces, Contouring and Volumes
- Plotting

TRAINING WITH TOPCON SOLUTIONS STORES
